

Curriculum Vitae of Dr. Nicholas Patrick Danks

Name:	Nicholas Patrick Danks
Trinity Title:	Associate Professor
Start Date in current post:	01/08/2020
Faculty:	Subject Area: Information Systems, Business Analytics School: Trinity Business School Faculty: Arts, Humanities and Social Sciences
Supervisor:	Ashish Kumar Jha (Subject Area Coordinator)
Email	Nicholas.danks@tcd.ie
Tel	(+353) 085 166 7426
Address	Dublin 6, Ireland

Curriculum Vitae

Professional Qualifications

Qualification	Institution	Degree	Subject	Date Conferred
PhD in Service Science	National Tsing Hua University	PhD	Business Analytics and Service Science	2020
Bachelor of Accounting Science	University of South Africa	B. Compt.	Accounting Science	2008
Master of Business Administration	National Tsing Hua University	MBA	Business Administration	2016

Doctoral Dissertation

Title	Date Submitted
English Title: Extending Predictive Methods for Partial Least Squares Path Models (PLS-PM)	June 2020
Mandarin Title: 擴展預測方法偏最小平方法	

Professional Memberships

Details	Date From	Date To
Member of Analytics Institute of Ireland	01/09/2021	Current
Member of Association of Computing Machines (ACM)	01/03/2023	Current
Member of Association of Information Systems (AIS)	01/01/2020	Current

Career to Date

Position Held	Where	Date From	Date To
Associate Professor of Business Analytics	Trinity Business School, Trinity College, Dublin	01/02/2023	Current
Assistant Professor of Business Analytics	Trinity Business School, Trinity College, Dublin	01/08/2020	31/01/2023
Visiting Lecturer	Otto-von-Guericke University, Magdeburg, Germany	01/10/2019	21/12/2019
Educator	National Tsing Hua University, Taiwan	Sep 2017	Sep 2019
Guest Lecturer	North West University, South Africa	11/05/2021	11/05/2021

Teaching Description

Module Name and Code	Level & Programme
BU7150 Data Mining	This module is a practical module taught using either Python or R. This module introduces the popular machine learning methods such as regression, trees, classification methods, neural nets, boosting, bagging, etc. I teach students to solve actual business problems using statistical methods. However, a key focus of the module is ALSO on communicating and reporting. Thus, there are weekly homework which take the form of a business report, as well as a group presentation and group project.
BU8106 Leading with Business Analytics and AI	This module is aimed at the Executive Education audience and is a core module in the executive MBA. In this module I introduce AI (machine learning not Generative AI) and use a no-code environment to make senior managers comfortable with the machine learning methods in a non-technical way. Once the executives are comfortable with the world of AI, we then discuss how to manage data analytics department, data operations pipeline, and business strategy to leverage business analytics and AI methods.
BU7135 Strategic Technology Management	This module is offered on the executive MBA and focuses on teaching IS and digital transformation. This is standard IS transformation theory as well as specifically data transformation theory.
BU7145 Strategy for Analytics	This module is a general strategy module for MSc Business Analytics and teaches the modern platform model, how to generate an information or competitive asymmetry in a platform product and how to develop this into a data strategy which links to the individual use case.
BU8017 Advanced Quantitative Methods	This is the quantitative methods seminar for the PhD program at Trinity Business School. This is a weekly module in which I present the key quantitative research methods, experiments, causal modeling, directed acyclic graphs, quasi-experiments and econometric modeling for business research. Every week we review 2- 3 papers and discuss the strengths, weaknesses and quality from a rigor and scientific value perspective. Students are expected to be

	able to develop a rigorous research study design from scratch.
BU7144 Forecasting	This module teaches the application of time-series methods in R or Python. This module introduces the popular forecasting methods such as regression, ARIMA, ETS, smoothing, etc. I teach students to solve actual business problems using statistical methods. However, a key focus of the module is ALSO on communicating and reporting. Thus, there are weekly homework which take the form of a business report, as well as a group presentation and group project.
BU7706 Operations Analytics	This is a core module teaching quantitative methods for the MSc in Operations and Supply Chain Management. In this module, I lecture on the newsvendor model, queuing theory, and process and flow optimization in the supply chain.
BUU11550 Information Systems and Data Management	This is an undergraduate module teaching fundamental introduction to MIS theory, strategy, and the IT function in the organization.
